## SCIENTIFIC MISCELLANY

Reported weekly for the Ledger.

**Tree-Growth in Grass.**—Science as a  
Hobby.—Stellar Tin.—Causes of  
Fire.—Solid Building Foundations.  
—London's Smoke.—Plating With  
Cadmium.—Suggestion in Skin  
Disease.—Antimony Planting.

The effect of grass on tree growth  
has been studied in England, at the  
Woburn Experimental Farm, for  
seventeen years. Spencer Pickering  
reports that in general various grasses  
retard the growth of fruit and other  
trees over whose roots they may be  
growing, and in the case of freshly  
planted trees the action is decidedly  
injurious or even fatal. Experiment  
has shown that the effect cannot be  
due to abstraction of food or moisture  
from the soil, nor to influence on soil  
temperature or on the gases contain-  
ed, nor to the formation of acid or  
alkali. Some poison produced by the  
grass—directly or through bacteria—  
may affect the tree roots, but the  
latest experiments make it appear that  
the real influence is due to the killing  
by the grass of the root bacteria  
that in some way promote the tree  
growth. The roots seem to owe their  
function to bacteria action—a con-  
clusion of great and far-reaching  
significance, if verified.

Vary the routine of daily labor by  
cultivating a scientific hobby, is the  
advice of Prof. S. P. Thompson, who  
reminds us that much of the world's  
scientific work has been done by  
amateurs. For instance William Her-  
schell, the astronomer, was a music  
teacher; William Gilbert, author of  
De Magnete, was a medical man, Dr.  
W. H. Dallinger, authority on the  
microscope, was a clergyman; and  
William Sturgeon, inventor of the  
electromagnet, was a shoemaker.

Observations of the spectrum of  
Alpha Scorpil made at the Cape of  
Good Hope, have shown a puzzling  
line that an English astronomer has  
attributed to tin. If this proves to  
be correct, it is the first discovery of  
tin ever made in the atmosphere of a  
star.

Returns by the London Fire Brigade  
show that the careless practice of  
dropping matches and other lights is  
the most prolific source of conflagra-  
tions, more than 21 per cent of the  
3413 fires which occurred in the  
county of London last year having  
been due to this cause. Not less than  
257 fires arose from unprotected  
lights, 148 from oil lamps, 67 from  
improperly set up stoves, 38 from hot  
ashes, and 235 from sparks from  
grates. Gas leaks and the reckless  
search for them with lights resulted  
in 134 fires. Defective wiring for  
electric circuits led to 100 fires, some  
of them quite disastrous, but it is  
believed that the new regulations and  
safeguards urged upon architects by  
electrical engineers will make quite  
safe such wires as may be placed in  
future.

The "compressor" method of mak-  
ing foundations, which has been  
under test for six or seven years in  
Paris, consists in forcing a tapering  
ram down to hard pan and then  
ramming into the hole successive  
layers of stones and rubble. The pro-  
cess thus forms a solid conglomerate  
pile of the shape of an inverted mush-  
room, with a base four to six feet in  
diameter. For ordinary foundations  
one such pile takes the place of five  
or six wooden ones, and it will sup-  
port an enormous load without sink-  
ing or collapsing. In wet earth, clay  
is introduced around the hole to make  
the sides water-tight.

Half of the smoke cloud that the  
London County Council is trying to  
suppress is believed to be due to the  
ordinary domestic grate. In winter—  
on days when most business places  
have been closed—the smoke of a  
million domestic chimneys has been  
seen to rise in a solid bank 3000 or  
4000 feet and drift with the wind to  
a distance of 50 miles in such density  
as to hide the sun. Dr. Shaw's esti-  
mate is that one-half of London's  
sunshine is cut off by smoke in  
winter and one-sixth in summer.

The difficulties of electroplating  
with cadmium have been recently  
overcome, thus opening up an  
important use for the metal, which is  
now obtainable at a moderate price.  
The best results have been obtained  
from specially prepared cadmium  
carbonate, carefully purified, although  
the commercial salt has proven fairly  
satisfactory. The cadmium carbonate  
is dissolved in a solution of potassium  
cyanide, forming a clear, bright  
yellow plating bath, and a cadmium  
plate is used for the anode. A per-  
fect deposit is had with either a hot  
or a cold bath, a temperature of about  
125 degrees F. being preferred. The  
coating, though soft, is harder than  
silver, and the color is as white as  
tin, but not so white as silver. The  
surface, which takes a very high  
polish is not readily tarnished by  
sulphuretted hydrogen or other  
vapors.

One of the surprises of the time is  
the conservatism of medical science  
in leaving chiefly to charlatans and  
impostors such powerful healing  
agents as electricity and mental  
effort. A German report mentions  
the remarkable experience of Dr. Von  
Szeollosy with a case of multiple  
neurotic gangrene of the skin in a  
young woman aged twenty. An ulcer  
on the back of the left hand had

## ITEMS WORTHY OF PERUSAL.

The Austrian salt mine at Wieliczka  
has 600 miles of galleries and 9000  
miners. It has been worked for six  
centuries.  
The town of Orson, Sweden, is  
without taxes. The necessary re-  
venues are derived from a forest re-  
servation.  
The lace trade of Nottingham is so  
active at the present time that it  
seems to be impossible to get girls  
enough for the work. There is work  
for 5000 more girls. The demand is  
in every department, and the labor is  
chiefly unskilled, but the girls make  
from \$2.50 to \$7.50 per week. Be-  
cause of this scarcity of labor one  
firm of that city has been compelled  
to open a branch factory in a neigh-  
boring city.

Receipt books, location blanks, deeds  
mortgages, promissory notes, etc., for  
sale; also mining signals on  
cloth, graduation diplomas, at the  
Ledger office.

### Reports on City Ownership.

The investigation of public owner-  
ship of public utilities in Europe and  
this country by the National Civic  
Federation's commission has resulted  
in two reports, one by Prof. John R.  
Commons of Wisconsin University  
favorable to the proposition and the  
other by J. W. Sullivan of the Cloth-  
ing Trades Bulletin disapproving.  
Prof. Commons says they found the  
privately owned utilities in England  
dividing surplus for civic better-  
ments because of the prevailing ten-  
dency toward public ownership and its  
example in cities where it had been  
adopted. Many have shrewdly ar-  
ranged copartnership plans and have  
recognized the labor unions. He is  
convinced that the recognition of the  
unions is the safeguard against polit-  
ical corruption in public ownership  
and that private ownership offers no  
escape from politics.

Editor Sullivan says that in all but  
the most poorly paid forms of labor  
public ownership has not raised or  
improved conditions of work. He  
contends that in England no street  
car business has ever been a private  
enterprise, in the sense that the word  
is used in this country, thus making  
comparison with American conditions  
unfair. Taking Syracuse, Allegheny  
and Wheeling as the best samples of  
American municipalization offered,  
they found conclusive evidence of  
political rottenness in each case. He  
regards it as "a project to restrict  
men in their activities by methods  
foreign to the American genius."

"Dr. Thomas' Electric Oil is the  
best remedy for that often fatal  
disease—croup. Has been used with  
success in our family for eight years."  
—Mrs L. Whitesacre, Buffalo, N. Y.

### Land and Mineral Decisions.

**Coal:** Failure to file declaration  
statement within sixty days after date  
of actual possession, and make pay-  
ment within one year from expiration  
of the time for filing, renders the  
land subject to the entry of another  
who has complied with the law.

**Final proof:** Final proof taken  
without authority or notice is void.  
False swearing in making final  
proof, is punishable under the law.  
Final proof though technically  
complete, is not always received.

Ready-made proof submitted before  
the attesting officer without proper  
cross-examination should not be  
accepted.

**Mineral:** Land chiefly valuable for  
phosphate deposits is mineral in char-  
acter.

Land containing a deposit of gyp-  
sum cement, and more valuable on  
account of such mineral than for  
agriculture, is not subject to agri-  
cultural entry. Land containing  
guano may be entered as mineral land.

**Ladies Attention!** Send your name,

## Lehnhardt's Candy

Is so pure, fresh and delicious  
that each piece seems to hold  
some new delight to lure you  
on to  
"Just one more."  
Mail us a P. O. or express  
money order, and we will do  
the rest.

One pound box 75c.  
Two pound box \$1.35.  
Chocolate or French Mixed.  
Put up in heat resisting,  
moisture proof packages.  
Express or postage prepaid.  
**LEHNHARDT'S**  
1159 Broadway, Oakland, Cal.

## From Our Exchanges

About 6000 persons are arrested each  
year for betting on the streets of  
London. One man has been arrested  
fifty-seven times.  
Forty thousand persons are engaged  
in the manufacture of stockings in  
England.  
The output of the gold mines of  
the Transvaal averages \$10,000,000 a  
month.  
Russia's military expenses amount  
to \$195,000,000 annually.

### BABYLONIAN LETTERS.

All deductions made, however,  
these epistolary records of the age of  
the Jewish exile are well worth read-  
ing, says the London Saturday Re-  
view. They serve to enforce the  
lesson that human life is much the  
same at all times and in all places,  
provided it is led in a civilized com-  
munity. Human wants and even the  
expression of them do not vary much.

The letters, like all others in the  
cuneiform script, were written on a  
clay tablets, which were inclosed in a  
clay envelope bearing the address.  
There were already complaints that  
work was insufficiently paid. A  
brewer, for instance, writes to say  
that "after I have made forty-one  
cases of 1-year-old beer and twelve  
cases of old beer in four months in  
the cellar adjoining that of Rimut-  
han, one man of silver is too little."

Another writer protests: "In the  
matter of the money which my father  
has sent, the money which has been  
paid for the dates is too little. Let  
my father specially send two manas of  
silver in addition, or I shall gain  
nothing on the transaction." The  
workmen were frequently paid in  
kind; sometimes, however, a lump  
sum of money was paid down, out of  
which the artisan was expected to find  
his own food. One letter casts a  
rather lurid light on the relations  
between the employers and employed.

The writer states that a workman had  
gone blind, and that consequently  
his pay must be stopped and his place  
taken by some one else. Between the  
state of society reflected in this letter  
and the workmen's compensation bill  
the distance is considerable. In  
another letter we are told that a  
strike is threatening, and for the very  
efficient, but very oriental, reason  
that the workmen had not received  
their pay. "All the stonemasons," it  
is said, have been uttering discon-  
tent, saying, "He oppresses us; none  
gives us our pay for the months Sivan  
or Tammuz." Let my Lord command  
that they be paid, for they are grow-  
ing very threatening."

Ladies, as might be supposed, ap-  
pear among the correspondents. One  
of them was a careful housewife who  
impresses upon her husband to "put  
the meat which has been sent you  
into salt; but if you are not ready to  
do so give it to Nazir, after the ninth  
day." Another is equally character-  
istic. Why, pray, am I and my  
daughters to pass the time thirsting  
for a letter from you? Now gather  
your wits together and then, by the  
Samas, observe! Why, pray, has Bul-  
ballit taken away all my dates?  
When I spoke to Bel-upahur about  
it he answered, "See, your dates be-  
long to Bel-uballit, but Bel-uballit  
has not given me back a single one.  
When I told them that the dates were  
our own produce they said to me,  
'Get you gone and speak to the son of  
Dakora about it.' When I spoke to  
them a second time they said, 'Go  
away and call on the gods.'"

The process of manufacturing silk  
made from wood pulp is one which  
in Europe is jealously guarded from  
inspection. The imitation silk sells  
for considerably less than real silk,  
but at a higher price than mercerized  
cotton.

Consul A. E. Smith of Victoria  
states that perhaps nowhere on this  
continent has the automobile trade  
expanded more quickly or the use of  
such machines become more general,  
in proportion to the population, than  
in Victoria.

Dear are relatively numerous in  
various parts of Japan, and in such  
show places as Maru and Miyajima  
are held as sacred, becoming so tame  
as to eat from the hands of visitors.  
They are generally smaller in size  
than the American deer.

The entire white population of  
Rhodesia is only 12,500.  
The motor licenses issued last year  
in England numbered 5443.  
The price of whalebone has risen in  
100 years from \$150 to \$1500 per ton.  
The Mohammedans of the world are  
estimated at 200,000,000.  
England's fishing fleet, consists of  
26,501 boats and 105,793 men.

The tide of emigration in England  
has turned from South Africa to  
Canada.

The London police force guards  
property valued at over \$250,000,000.  
England's drink bill has been de-  
creasing steadily for six years.  
Seventeen out of every 100 French  
families are childless.

Two crimes which are on the de-  
crease are arson and counterfeiting.  
Australia is spending \$10,000,000 on  
a fleet of torpedo boats and destroyers.  
The average glass of whisky is 57  
per cent alcohol.

Three-quarters of the Englishman's  
bread comes from abroad, and also  
two-fifths of his meat.

A web two and a quarter miles long  
has been drawn from the body of a  
single spider.

Fifty-one men in a thousand marry  
under 21 years of age. The average  
for women is 168 per 1000.  
The record weight for the human  
heart is a little over 40 ounces. The  
average is 9 1/2 ounces.

In England 85,000 people live on  
canal boats.

A North Sea codfish boat usually  
carries eight miles of lines and 5000  
hooks.

With the country on a peace foot-  
ing it costs England \$3,250,000 a year  
to feed the horses of her army.

The oldest warship in existence is  
the English Victory, which was  
launched in 1765.

At last accounts the total number  
of women in this country over the  
age of 16 was 23,485,559.

In 1900 women were represented in  
all of the 303 bread-winning occupa-  
tions of the United States but nine.

Northern, Florida and Southern  
Georgia can boast of some of the  
largest tobacco plantations in the  
world.

The advantage of artificial shade  
in the growing of tobacco and other  
crops consists of the conserving of  
the moisture in the soil.

It is said that one-eighth of the  
revenues of the United States is de-  
rived from the tobacco industry in  
one form or another.

bread comes from abroad, and also  
two-fifths of his meat.

A web two and a quarter miles long  
has been drawn from the body of a  
single spider.

Fifty-one men in a thousand marry  
under 21 years of age. The average  
for women is 168 per 1000.  
The record weight for the human  
heart is a little over 40 ounces. The  
average is 9 1/2 ounces.

In England 85,000 people live on  
canal boats.

A North Sea codfish boat usually  
carries eight miles of lines and 5000  
hooks.

With the country on a peace foot-  
ing it costs England \$3,250,000 a year  
to feed the horses of her army.

The oldest warship in existence is  
the English Victory, which was  
launched in 1765.

At last accounts the total number  
of women in this country over the  
age of 16 was 23,485,559.

In 1900 women were represented in  
all of the 303 bread-winning occupa-  
tions of the United States but nine.

Northern, Florida and Southern  
Georgia can boast of some of the  
largest tobacco plantations in the  
world.

The advantage of artificial shade  
in the growing of tobacco and other  
crops consists of the conserving of  
the moisture in the soil.

It is said that one-eighth of the  
revenues of the United States is de-  
rived from the tobacco industry in  
one form or another.

## From Our Exchanges

About 6000 persons are arrested each  
year for betting on the streets of  
London. One man has been arrested  
fifty-seven times.  
Forty thousand persons are engaged  
in the manufacture of stockings in  
England.  
The output of the gold mines of  
the Transvaal averages \$10,000,000 a  
month.  
Russia's military expenses amount  
to \$195,000,000 annually.

### BABYLONIAN LETTERS.

All deductions made, however,  
these epistolary records of the age of  
the Jewish exile are well worth read-  
ing, says the London Saturday Re-  
view. They serve to enforce the  
lesson that human life is much the  
same at all times and in all places,  
provided it is led in a civilized com-  
munity. Human wants and even the  
expression of them do not vary much.

The letters, like all others in the  
cuneiform script, were written on a  
clay tablets, which were inclosed in a  
clay envelope bearing the address.  
There were already complaints that  
work was insufficiently paid. A  
brewer, for instance, writes to say  
that "after I have made forty-one  
cases of 1-year-old beer and twelve  
cases of old beer in four months in  
the cellar adjoining that of Rimut-  
han, one man of silver is too little."

Another writer protests: "In the  
matter of the money which my father  
has sent, the money which has been  
paid for the dates is too little. Let  
my father specially send two manas of  
silver in addition, or I shall gain  
nothing on the transaction." The  
workmen were frequently paid in  
kind; sometimes, however, a lump  
sum of money was paid down, out of  
which the artisan was expected to find  
his own food. One letter casts a  
rather lurid light on the relations  
between the employers and employed.

The writer states that a workman had  
gone blind, and that consequently  
his pay must be stopped and his place  
taken by some one else. Between the  
state of society reflected in this letter  
and the workmen's compensation bill  
the distance is considerable. In  
another letter we are told that a  
strike is threatening, and for the very  
efficient, but very oriental, reason  
that the workmen had not received  
their pay. "All the stonemasons," it  
is said, have been uttering discon-  
tent, saying, "He oppresses us; none  
gives us our pay for the months Sivan  
or Tammuz." Let my Lord command  
that they be paid, for they are grow-  
ing very threatening."

Ladies, as might be supposed, ap-  
pear among the correspondents. One  
of them was a careful housewife who  
impresses upon her husband to "put  
the meat which has been sent you  
into salt; but if you are not ready to  
do so give it to Nazir, after the ninth  
day." Another is equally character-  
istic. Why, pray, am I and my  
daughters to pass the time thirsting  
for a letter from you? Now gather  
your wits together and then, by the  
Samas, observe! Why, pray, has Bul-  
ballit taken away all my dates?  
When I spoke to Bel-upahur about  
it he answered, "See, your dates be-  
long to Bel-uballit, but Bel-uballit  
has not given me back a single one.  
When I told them that the dates were  
our own produce they said to me,  
'Get you gone and speak to the son of  
Dakora about it.' When I spoke to  
them a second time they said, 'Go  
away and call on the gods.'"

The process of manufacturing silk  
made from wood pulp is one which  
in Europe is jealously guarded from  
inspection. The imitation silk sells  
for considerably less than real silk,  
but at a higher price than mercerized  
cotton.

Consul A. E. Smith of Victoria  
states that perhaps nowhere on this  
continent has the automobile trade  
expanded more quickly or the use of  
such machines become more general,  
in proportion to the population, than  
in Victoria.

Dear are relatively numerous in  
various parts of Japan, and in such

CITY OFFICIAL PAPER.

FRIDAY JULY 26, 1907

FOR EFFICIENT GOVERNMENT.

The crying need of Amador county is efficient and economical government. It is little use to talk about attracting immigration thitherward until we mend our ways in local management. We must have government for the people, not for a clique and favored few, otherwise our territory is not likely to forge ahead as it should do considering its natural advantages. We have no hesitation in saying we are not getting efficient government. On the contrary, we are getting wretchedly inefficient, recklessly extravagant government. The samples of misgovernment already pointed out in these columns recently are conclusive proof of this statement. If the abuses cited were knowingly tolerated by the supervising board, they constitute good grounds for investigation by a grand jury with a view of indicting the officials responsible therefor. If the abuses have been going on without the knowledge of officials who are elected for the purpose of guarding the people's interests in such matters, they reveal a system of carelessness and inefficiency which is equally reprehensible, and demands judicial investigation. The Ledger is firmly committed to the task of doing what it can to redeem this fair county from the withering blight of misrule. Whether the change comes speedily or after a protracted struggle, it matters not to us. There will be no final let-up to the policy until a better state of affairs prevails in local management. There is no partisanship in this fight. We cannot hope to prosper as a county unless there is a reasonable share of diligence and efficiency shown in the conduct of public business.

## Amador Style vs. Elsewhere

Last month the Ledger devoted considerable space to discussing the peculiarities of the system adopted in this county in calling for and awarding contract for supplies of stationery and printing for county officers, and also to the absence of all contract arrangements in regard to the main items of stationery, such as record books. We presented to our readers some of the absurdities of the stationery list as adopted for the basis of the bidding for such supplies, and also the fact that after the contract was let it was of little practical value in regulating the prices. In other words, the thing was so fixed up that it mystified instead of clarified the subject. In striking contrast with the method that by some process to us unknown has crept into Amador county affairs, we are now able to present a list of prices adopted in Monterey county for ordinary stationery supplies, as awarded to the lowest bidder. The people of Amador county can see the difference. We simply compare at this time the one item of paper, as space forbids us to print and comment upon the entire list at this time. The Monterey schedule is clear-cut; there is no deadweight for ulterior purposes attached to it. On the other hand the Amador list is absurd upon its face; impossible of being carried into actual practice. The Monterey list of paper supplies is as follows:

Willamette legal cap, plain or numbered, any weight, ream - \$2.00  
Bark parchment cap, per ream - 2.00  
Golden Gate cap, per ream - 1.50  
Letter tablets, 100 sheets, each - 0.15  
Manila, 100 sheets - 0.15  
Blotting paper, per pound - 0.10

The Amador list comprising such supplies reads as follows:

No. 1 best quality legal cap, 16 lbs per ream, Royal Mills - \$2.60  
No. 1 best quality foolscap, 16 lbs, per ream - 0.90  
No. 1 best quality bill cap, 16 lbs., per ream - 0.65  
No. 2 legal cap, 16 lbs., per ream 0.12  
No. 2 foolscap, 16 lbs., per ream 0.12  
No. 2 bill cap, 16 lbs., per ream 0.12  
No. 1 best quality letter cap, 12 lbs., per ream - 1.10  
No. 2 letter cap, best quality, 12 lbs., per ream - 0.09  
No. 1 best quality note paper, 5 lbs., per ream - 0.09  
No. 2 note paper, 5 lbs., per ream 0.07  
Manila legal tablets, 7 1/2 x 12 1/2, Blackstone, per doz - 1.40  
Blotting paper, sheets 19x24, extra heavy, 120 lbs., per ream 1.70

To the uninitiated the Amador list may seem much the more advantageous to the taxpayers than the other schedule. But those who understand such things, will say differently. The Monterey list is simply based on articles that are called for, and in quantities that are actually needed. There is nothing of the "No. 2 best quality 16 lbs." about it—meaningless expressions used in such connection. Such supplies cannot be had, for they are not made. So the three items called for are legal cap at \$2.60, against \$2 for the Monterey schedule. Manila tablets, 15c each for Monterey and \$1.40 per dozen for Amador, a slight difference in favor of the latter. But the blotting paper item shows the difference in the motives of the two lists. Monterey calls for 10 cents per pound, and doubtless orders by the pound. That is the way paper

For that  
Dandruff

There is one thing that will cure it—Ayer's Hair Vigor. It is a regular scalp-medicine. It quickly destroys the germs which cause this disease. The unhealthy scalp becomes healthy. The dandruff disappears, had to disappear. A healthy scalp means a great deal to you—healthy hair, no dandruff, no pimples, no eruptions.

The best kind of a testimonial—  
"Sold for over sixty years—  
Made by J. C. Ayer & Co., Lowell, Mass.  
Also manufactured by  
SARSAPARILLA  
PILLS  
CHERRY PECTORAL.

of all kinds is sold by the manufacturers. But Amador county calls for bids by the ream, and gets a rate of \$1.75 per ream of 120 lbs. Now we venture to say there never has been a ream of blotting paper, full sheets, delivered to any one house in the history of Amador county. So instead of ordering in ream lots, at \$1.75 per ream the county gets blotters by the dozen, cut up into ordinary size, and charges at the rate of \$65 per ream, or over 50 cents per pound. We will in a future issue continue the comparison of enumerated articles and rates, and demonstrate that all through the list the same discrepancy against Amador is in evidence. We close this by remarking, that whoever is responsible for originating the schedule list in Amador county ought to be awarded a medal as the champion hoodwinker in his special line in the country. We venture to say, there is nothing that will begin to compare with it in this or any other county in the United States. And for a little county like Amador that is saying a good deal.

## County Telephone Bills.

A bill was allowed at the last meeting of the board of supervisors in favor of the telephone company for \$32.80, representing the cost of telephoning by the county officials located in the court house and hall of records for the month of June. It does not represent the total cost of the phone business to the county as a few scattering charges of this character are included in other claims from outside the county sent. It may be interesting to know how this telephone bill is distributed among the different offices. The company presents an itemized bill of charges, complete in every particular, and hence it is an easy matter to segregate the charges to the various offices.

In addition to the regular charge of \$1.50 for each phone, 7 in all, making a total of \$10.50 per month, the June bill figures out as follows:  
School superintendent - \$ 3.60  
District attorney - 4.35  
Sheriff - 2.00  
County recorder - 3.00  
Superior judge - 3.45  
Assessor - 1.25  
Auditor and clerk - 4.05  
Fixed charges - 10.50  
Total - \$21.80

It would be a noteworthy exception to the rule, if a legislature failed to give a boost in some direction to the salaries or compensation of county officers. The last legislature was not an exception in this regard. At the meeting of the board of supervisors this month a bill was presented and allowed for the sum of \$30, for compensation of the county auditor in preparing a report and necessary data for the past six months in regard to the monthly allowances for orphans, half orphans, and abandoned children. This is the first bill of this nature that has been allowed, and of course the people generally will be glad to know the basis of the charge. The bill itself refers to Sec. 4069 of the statutes of 1907, being a part of the new county government bill. Turning to that section we find it reads as follows:

4069.—It shall be and is hereby made the duty of every county auditor in the State of California to keep all the books and necessary accounts with reference to payments made by the county of which he is auditor for minor orphans and half orphans, and abandoned children, and to prepare the necessary data and make out all claims against the state for such payments, and the board of supervisors may allow the auditor a reasonable compensation for performing the extra duty herein provided.

According to this section it is not mandatory upon the supervisors to allow extra compensation for the work named. The fixed salary is supposed to be the compensation in full for all services that are or may be hereafter required of the official. The strict reading of the new section leaves it to the discretion of the board of supervisors to allow a fair compensation for the extra work. But a more serious objection to the allowance at this time arises from the constitutional provision, as follows:

Sec. 9. The compensation of any county, city, town, or municipal officer shall not be increased after his election or during his term of office; nor shall the term of any such officer be extended beyond the period for which he is elected or appointed. Experience shows that even the fundamental law is brushed aside with little ceremony when the question of compensation is concerned. The restraints in this direction imposed by the constitution do not count for much. As it now stands, if the action of the supervisors is the criterion for the future, the introduction of this new provision amounts to a permanent addition of sixty dollars per year to the compensation of the auditor in Amador county.

## Amador County's Heavy Taxpayers.

In accordance with our usual custom, we publish this week a list of taxpayers who are on the assessment roll for \$4000 and over. This year on account of the many changes in valuations for assessment purposes the list will have special interest. Of course it is not absolutely correct, and some property holders have property in all townships, and others have mortgages as well as real estate. We have endeavored to get them all, but no doubt some items have been overlooked. It will be seen that the big taxpayers are bearing by all odds the lion's share of the burden of government.

## LOCAL NEWS

For Sale.—House and Lot of C. A. Herrick on Broadway for sale. Apply on the premises.

A. Arata, of the firm of Garbarini and Arata, with his family consisting of wife and two sons, also Mrs. White and family, and Miss Mamie Lavezzo, making a party of ten all told, started Saturday afternoon for an outing of a couple of weeks in the mountains, in the neighborhood of Bear River.

Mrs. Z. Kirkwood left this Friday morning for her summer resort in Alpine county.

M. Newman came up from San Francisco last Friday to spend a week with his family. He has a back and liver business near Golden Gate park in San Francisco, and is doing a fine business.

H. P. Vogt returned from San Francisco Friday. He left again for the city this morning on business with the Standard Electric company.

George Kirkwood started for the mountains yesterday morning, for a month's vacation. Mr. Holtz has charge of the lumber yard in his absence.

When you wish the finest flavored coffee and tea, remember that W. J. Nettie keeps only the best.

J. McCutchen, late of the Jackson Shoe Store, was adjudged insolvent in the United States Court last week. The bankrupt will have a certain time within which to file his schedule of assets and liabilities. A meeting of creditors will probably be called within a few days, after which matters will perhaps move along more expeditiously.

FOR SALE.—A house and lot in Jackson; also ranch, about 40 acres one mile east of Jackson. Apply to M. Newman.

Dr. C. A. Herrick left Monday morning for San Francisco. He goes for the purpose of engaging office space if possible, on or near Van Ness Avenue. He will probably return before leaving finally.

Mrs. Frank Simich left Monday morning for Tuscan Springs, in the northern part of the state, where she intends to stay for three weeks for her health.

Mrs. Lillie French, and her son Johnny Love, returned Monday evening, after a visit of over two weeks in San Francisco.

Furnished Rooms to let; inquire at Ledger office.

Ms. Gagliardo, and her two children, left Tuesday morning for their home in San Jose, after a visit of several weeks with the Marre family in this city.

Sheriff Sibley of San Joaquin came up Sunday, and on Monday, in company with sheriff Gregory went up to the saw mill of the Standard Electric company on Tiger creek.

A five year old son of A. Giannini, living near Middle Bar, broke his left arm twice recently. Last Tuesday he fell again, fracturing the same arm for the third time. He is getting along nicely under the care of Dr. Endicott.

Mr. Welch from the Gwin mine, is being treated at the Sierra sanitarium. A miner named Chris Burgovich, working at the Argonaut, had the misfortune to sever the tendons of his foot on the 21st instant, by striking his foot with an ax. It will take several weeks to recover so as to be able to resume work.

Dr. E. L. Phillips office is at his residence, on Hamilton tract, opposite California hotel.

During Tuesday night Mitchell Savich, employed at the Argonaut mine, was caught by a quantity of loose rock. He was struck in the back and arm, and severely bruised, although no bones were broken. He is under treatment by Dr. Phillips.

Repairing the dwelling house of Mrs. Genaro, on the Jackson Gate road opposite the Hamilton tract, which was badly gutted by fire several weeks ago, was started this week. The premises carried an insurance of \$800. The company concerned believed the property could be fixed up as good as before the fire for less money than the policy called for. Carpenters were called upon to figure on the job, with the outcome that a contract was let to Lewis Lamb, who has a force of men at work restoring the building. It will cost between \$600 and \$700.

Fresh stock of wall paper, complete line, all new designs at V. Giovannoni & Co.

F. W. Rubner has hit upon a novel advertising scheme. He is giving away caps to the boys. The caps are marked "Go to Rubner for Drugs." Nearly every youngster is decked out with one of these caps.

The Enterprise stable has been decorated with a coat of red paint this week on the Main street frontage.

## TRAPPED A BEAR.

An Exciting Experience of Hunting Party at Bear River.

The party of hunters who spent ten days hunting and fishing in the vicinity of Bear river got back from their trip last Saturday. They report one of the most exciting times in the history of hunting in that region. There were six in the party: John Garbarini, Frank Voorheis, Jack Barton, all of Jackson, E. G. Amick of Lone, Jas. Langdon of Sutter Creek, and Fred Johnson of New Hope.

The spot selected for their camp was at the Bear river dam of the Standard Electric Company—an ideal place for angling and hunting. It is between forty and fifty miles from Jackson. Two men—Fred Otis and Whitman, are keepers of the dam, remaining winter and summer to look after the company's interests.

When the Jackson party reached there the snow in places was piled up six or seven feet deep, but the warm weather since has reduced it to the liquid state.

Fishing was not as good as it might be, although the boys caught plenty for their own consumption. Some of the trout captured weighed over two pounds.

Amick, the lone representative, carried off the honors of the trip. He succeeded in shooting a couple of deer, and the monarch of the forest—a cinnamon bear—was cornered in his trap, with the bait of his furnishing. The method adopted in capturing this brute alive is worthy of extended explanation.

In preparing for this excursion, Amick took the precaution of taking with him an old horse. Arriving at the hunting grounds, this animal was shot at a spot selected. Then a powerful steel trap was brought into play. It was fastened by means of a chain to a long loose sapling, some twenty feet in length. The trap itself weighed sixty pounds, and with log and chain fully two hundred pounds. It was provided with teeth, so that when its jaws came together with a snap, the spikes would hold with the grip of a vise anything that came within its grasp. The approach was fixed up by means of logs placed in a slanting position, so that bruis could only get to the feast prepared for him by stepping across the narrowest part of the V formed by these logs. On the other side of the sticks was secreted the trap, carefully covered up with brush and earth. It was designed that the first paw that Mr. Bear placed over the dead line would spring the trap and cause the foot to be clamped tightly by the trap, the attachments of chain and log being intended to impede his movements after capture.

On Saturday, July 13, four or five days after arranging the trap, Amick and Garbarini repaired to the spot to see how matters were progressing. It was a mile and a half distant from the camp by the dam. Before reaching the place, they heard the distressed cries of bruin, bellowing like a calf, and they were satisfied that the decoy had worked to a charm. It was shortly after day light that they came up to him. He had evidently only been trapped a short time, although considerably fagged out by his efforts to release himself from his novel attachments.

As soon as they realized the situation, the two men hastened back to camp to get ropes and further help, with the view of taking him alive to camp. The boys at camp were all astir when told the news, and repaired en masse to the scene to assist in the capture.

The animal had not traveled more than a hundred feet from the point of capture. The long stick had become jammed against the trunk of a tree so the brute was pretty well tied up and exhausted by his efforts to escape. After several attempts, two ropes were attached—one to a fore foot, the other to one of the hind legs. A strong man was assigned to the charge of each rope. Fred Johnson assumed the front place, and Johnnie Garbarini took the hind tether. By tugging him into camp devices he was finally led into camp alive and well. Occasionally he would make a vicious lunge to reach his tormentors, but the men at the ropes, together with the trap and log kept under fair control.

He was a big specimen of his tribe, weighing about 350 pounds. He was not in plump condition, having but recently emerged from his winter torpor. What to do with him after getting him safely in camp was the next question. It was useless to think of bringing him to town. It was too big an undertaking, and besides he would be only a source of trouble here as elsewhere. So it was wisely determined to kill him. On Wednesday of last week he was shot at the camp on Bear river. The boys had lots of bear meat, and brought plenty to distribute among their friends. Amick, as the owner of the trap, and the furnisher of the bait that turned the trick, kept the hide as a trophy of one of the most remarkable hunting achievements in Amador county.

FOR SALE.—2 houses and 3 lots near Fremont and Bunker Hill mine, plenty choice fruits and garden spot. A good bargain for some family or business people. Also a mountain timber ranch of 120 acres near Piccardo and Mace places. Well covered with large timbers and other mining materials; terms reasonable or will rent the above place. Apply to L. Galli, New York Ranch.

Miss Grace Folger left Sunday, to return to her duties as assistant in the Vallejo post office.

Miss Annie Davitt, who has been employed in the McGary store, is taking a month's vacation. Miss Giannini has taken her place in the store until she returns.

Miss Hayford left Sunday on her summer vacation.

## AN EXPLODED STORY.

Johnny Burke all right in Blair.

A foolish story was circulated here to the effect that Johnny Burke, who for some time was employed in the Jackson Shoe Store, had gone insane in Nevada, and was sent to the insane asylum at Carson; that he made his escape from that institution, and wandered off into the desert and had not been heard of since, the supposition being that he perished in the sagebrush wastes. The story seems to have started from letters sent from Nevada, but without any authentic data upon which to base the reports of disaster. He left here several months ago, and went to Blair, a new mining camp in the Tonopah country, and found employment in a mine over which A. Noce, formerly of the Oneida, was superintendent.

The tales of his mental breakdown came to the ears of his relatives hereabouts. He is a nephew of Mrs. Perry Lepley, whose husband works at the Kennedy. Mr. Lepley was worried over the tidings of evil, and determined to find out the truth. Last week he telegraphed to A. Noce, requesting him to answer by telegram what he knew about the matter.

Last Saturday he received a dispatch in reply, not from Noce, but from Burke himself, saying briefly that he was alive and well, and that a letter would follow by the next mail.

The letter came to hand promptly, and shows that there was not a shred of truth in the whole story of insanity. The young man explains that after working in Blair for some time, he left that camp, and proceeded to Goldfield—supposed to be the Mecca of the hosts of labor, where abundance of work at top notch wages is ready for all comers. He was sadly disappointed, and found everything overdone, with a dozen men waiting to grab every job in sight. He next went to Tonopah, and hoped to get employment in some store. Places of this kind were scarce. So finally he drifted back to Blair, and at the time of writing was waiting on table, enjoying good health, and earning better wages than he formerly got at the mine, and not nearly such hard toil. His many friends through Amador will be pleased to hear of the absolute denial of the alarming reports that were started concerning him.

## A Double Celebration on the Tapis.

Jackson is threatened with a piethora in the celebratory line. The Native Sons of Excelsior Parlor is taking steps to celebrate admission day, September 9. At the same time the local miners' union is thinking of celebrating labor day on the 24 of September. It is admitted on all sides that it would be suicidal to have two demonstrations so close together—the one would inevitably interfere with the success of the other. Both sides have been canvassing for subscriptions during the week. For the admission day affair the sum promised amounts to between \$500 and \$600. It is claimed that they must have at least \$800 before they would be justified in going ahead; some claim \$1000 is necessary. It is doubtful if the list can be swelled to the minimum amount.

The labor union folks have also canvassed the field. They have a smaller amount on their list, but it seems their ideas in the celebration line are on a more moderate scale. It is reported that they are resolved to go ahead anyway.

Why not both orders unite, and have a joint celebration, sharing the profits or losses as the case might be.

## Was Jared Not Boxed

Diek Ramazzotti a miner employed at the South Eureka mine, while holding a long iron pipe upright and scraping the rust therefrom, accidentally brought the pipe against a couple of electric wires overhead, producing a short circuit. The result was that he received a shock which reminded him abruptly that "something was doing" above and to "look out below." Although badly jarred he will not be "boxed" as his injuries are slight, but he will not only look out but also look up while working around electric wires.—Amador Record.

## Moonlight Trip.

A party of Jacksonites took a delightful trip to Electra on Wednesday evening in the peculiar light of the partially eclipsed moon. The special object of the trip was to visit Mr. and Mrs. Jesse McLaughlin, who were apprised of the intended visit, and had made preparations for their reception. There were fifteen in the party. Arriving at the plant they were accorded a royal welcome. An excellent supper was spread, and dancing in the club room was indulged in for several hours. A very delightful time was spent. Those comprising the party were: Mr. and Mrs. Frank Podesta, Miss Louise Cassinelli, Miss Emma Paramino, Miss Julia Ginochchio, Miss Oda Ginochchio, Mrs. F. Burgin, Miss Agnes Newman, Miss Margaret McDonald, and Miss Kelly; Jack Thomas, Geo. Yela, Emile Marucci, Julius Podesta, R. I. Kerr and W. J. Peters.

Stops itching instantly. Cures piles, eczema, salt rheum, tetter, itch, hives, herpes, scabies—Don's Ointment. At any drug store.

The city fathers have passed or introduced an ordinance prohibiting signboards from projecting over the street way. It is not intended to interfere with the hanging of signs within a reasonable distance above the sidewalks, but the obstruction of the view along the street by business signs will no longer be tolerated. In compliance with this proposed law, projecting signs are coming down.

A brother of J. H. Langhorst from Plumas county, is visiting his relatives in this city.

## DOCUMENTS RECORDED.

(The following instruments have been filed for record in the recorder's office since our last report. We publish a complete list of documents recorded, and must decline to accept any request to suppress any document from these columns. Don't ask us to do so.)

Deeds.—Latitia Tibbitts to Teresa Ghiglietti et al, lot in New Chicago, \$1.

Costanza Bo et al to Teresa Ghiglietti et al, lot in New Chicago, \$1.

Teresa Ghiglietti et al to Alberto Cariglio et al, lot in New Chicago, \$10.

J. Arthur Little and wife to Mrs. Mary Shear and Minnie Provis, part of lot 10 block 12, Sutter Creek \$750. John Guisti to G. B. Caldwell, lot 7 Hamilton subdivision of Jackson, \$10.

G. B. Caldwell to Julia M. Oneto, lot 7 of Hamilton subdivision of Jackson, \$5.

Alex Eudey and wife to C. L. Culbert and Julius Chichizola.—National hotel lot, Jackson, \$10.

Julius Chichizola and C. L. Culbert to Bank of Amador County, National hotel lot, also lot 10 block 10, Jackson, \$1.

Fred A. Goodman to Jennie Goodman, 40 acres 4-7-13, love and affection.

Chris Marella and wife to Pete Savich lot 28 Hamilton subdivision of Jackson, \$10.

Mortgages. Angelo Contrucci and wife to Salvatore Dal Porta, lot in New Chicago, \$900, 1 year, 10 per cent.

C. N. Beal to El Dorado Water and Deep Gravel Co., canals ditches, etc., in El Dorado and Amador counties, \$122,500; payable June 15, 1908, C per cent.

Chattel Mortgage.—Angelo Contrucci to S. Dal Porta, bar and fixtures in New Chicago, \$100, 10 per cent, 1 year.

Lease.—Joseph Drendel and wife to John Drendel, land near Jackson, horses, etc., 3 years, \$900.

Notice of Forfeiture.—B. W. Pitts vs. Butenuth—Notice of forfeiture for non-payment of assessment on Mountain King and Queen mines, Pine Grove.

Trust Deed.—Pete Savich to Bank of Amador County, \$500, lot 28 Hamilton subdivision.

Satisfaction of Lien.—Amador Co. Lumber Co. to Francisco.

Patent.—U. S. to Fred H. Goodman, 40 acres, 4-7-13.

Release of Attachment.—Franceschi to Giannini.

Reconveyance.—C. L. Culbert et al to Teresa Ghiglietti et al, lot in New Chicago, \$1.

C. L. Culbert to Bridget Mooney, property held under deed of trust, \$500.

Agreement.—Geo. W. Hilfery to W. E. Downs, assignment of certain interest in agreement of bond for deed recorded March 30, 1906.

B. W. Pitts to John J. Cramer, bond for deed to Mountain King and Mountain Queen quartz mines, Pine Grove, \$2500, payable 18 months, with right to mine.

Bond for Deed.—Frank E. Blakeley to J. J. Cramer, right to mine on the Blakeley quartz mine, \$2000, payable on or before June 1, 1909.

## BASEBALL.

Professionals vs. Business Men.

The attraction at the base ball grounds of the Jackson Athletic club last Sunday was a game between a picked nine of professional men against a team of the business men of this city. The same teams played a game in May last, which resulted in a draw. So this decisive contest was arranged to determine the question of supremacy. It was further announced that a stake of \$100 a side was dependent upon the result, also a champagne supper. We cannot vouch for the coin issue, but every one within a reasonable distance of Main street was made aware of the fact that the champagne programme was carried out to the letter during the evening. The line-up of the players was as follows:

Business Men. Professionals.  
M. W. Ford c C. E. Vicini  
F. Valvo p E. E. Endicott  
Paul Poggi 1st b C. A. Herrick  
Robert I. Kerr 2d b J. W. Caldwell  
Vic Rocco 3d b A. M. Gall  
Jos. Ratto ss C. W. Schacht  
Tony Prato lf Henry Hayden  
G. Voorheis cf J. F. Wilson  
John Garbarini rf Wm. G. Snyder

The attendance was not as large as was expected, but the game was a source of infinite amusement to both onlookers and players.

The score was 34 to 17 in favor of the professionals. It was a great game all round, and drew forth lots of fun if not good playing.

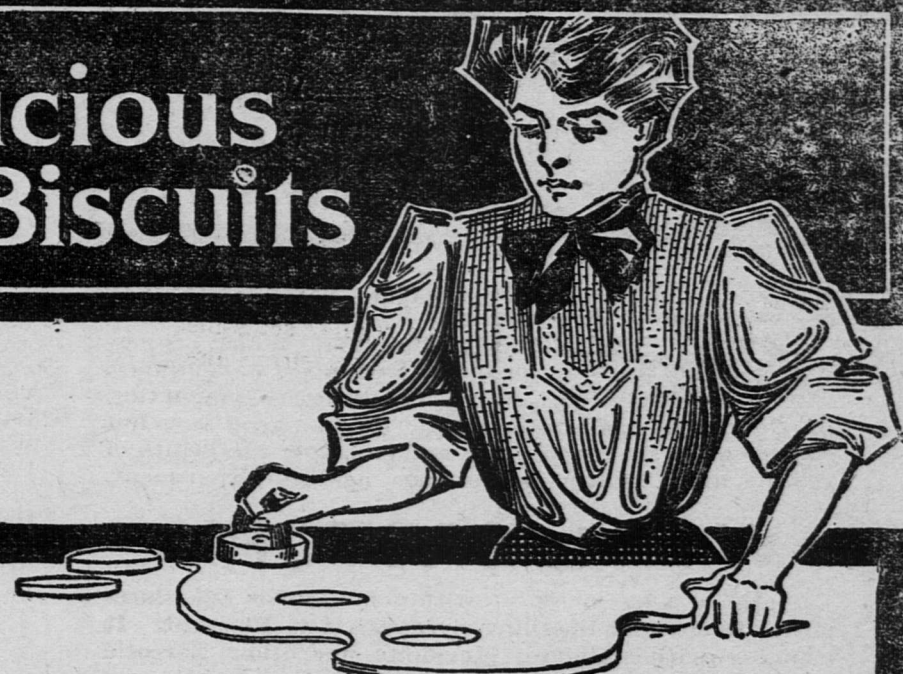

In the evening victors and vanquished fraternized in having a good time, with a banquet and champagne. The roystering and jubulations were continued for several hours, everyone having a surfeit of merriment.

## Card of Thanks.

To the many friends who so kindly assisted us in our late bereavement, we wish to extend our sincere thanks. Mrs. W. Schillings, and family.

Miss Mamie Wheeler of Plymouth left last Wednesday for Felton, near Santa Cruz, the last of a family to leave here, where they have lived for a number of years. S. C. Wheeler, her father, has been quite a prominent man in many ways to mining, and ranching and for a number of years was school trustee. Some time before his departure for Felton his health failed him but we are glad to hear the report that he has quite recovered, and that they are all well pleased with their new home. One son remains in Plymouth, our constable Norman Wheeler and his family who reside there. Miss Mamie we understand will not teach school but is engaged as private secretary to a lumber warehouse in Oakland. We wish her success in her new undertaking.—Amador Record.

## Delicious Hot-Biscuits

On every home table there may be served every day a plate of pure, healthful, delicious hot-biscuits by following the "CLEVELAND" Cook. There is no economy in saving a few cents by using Alum Baking Powders. The cheap alum baking powders work sure injury to the health. Enjoy the purest of home cooking by using

## CLEVELAND'S SUPERIOR BAKING POWDER

Made from a Superior grade of Pure Cream of Tartar.

## SCHOOL APPORTIONMENT.

Jackson, Cal., July 23, 1907.

To Boards of School Trustees, Amador County.

Ladies and Gentlemen:—Following is a report of the second State apportionment and the last for the school year ending June 30, 1907.

State Superintendent Edward Hyatt reports \$7769.65 apportioned to the Primary and Grammar schools of Amador county, to this sum I added \$56.34 the unapportioned balance of State money.

Of this amount I have apportioned \$7825.95 leaving a balance of 14c in the unapportioned state fund.

## NAME OF DISTRICT.

NAME OF DISTRICT.	Amount apportioned to the State Fund.	Amount of State money received for school year 1906-07.
1. Aetna	49 272.93	49 272.93
2. Amador City	111 618.27	111 618.27

Total	1405 8782.95	1405 8782.95

Balance unapportioned .14

\*Indicates Joint Districts.

Respectfully,  
W. H. GREENHALGH,  
County Superintendent.

## Unclaimed Letters.

In Jackson postoffice July 26, 1907.

Felice Armanini (2), G. W. Booth, Bisi Evaristo, Teresa Martinucci, Mr. Martinucci, Pete Poletti (pkg.), M. Ricciardi, D. Rosa (2), James Tremblay (2), J. L. Wise, Miss Lily Williams.—Frank H. Uden, postmaster.

Garden hose, lawn sprinklers, lawn mowers, rakes, boxes and spades, in fact everything needed for lawn or garden at V. Giovannoni & Co.

Ledger & Chicago Inter-Ocean, \$2.50

## MINING NOTES.

South Eureka.—It was reported here early in the week that a large body of good milling ore was discovered in crosscutting from the 2300 level. It is a new vein, said to be from 8 to 10 feet wide. Its assay value was not determined at the time. We trust the good news is true. It will give a new life to this mine.

## SUPERIOR COURT.

HON. R. C. BUST JUDGE.  
Estate of Frederick Werner.—W. J. McElie petitions for letters, August 3 set for hearing.

Florence Giannini vs. F. Franceschi.—Action dismissed at request of plaintiff's attorney.

Estate of John A. Votaw.—Joseph Schillings appointed administrator upon filing bond in the sum of \$2000.

Estate of Nicholas B. Schillings.—Continued at request of petitioner.

Estate of W. H. Russell.—Briefs offered. Counsel for administrator allowed to make further argument August 3.

Guardianship of Albert T. Perry.—Order made appointing Louis A. Perry guardian, upon filing bond of \$800.

Estate of John T. Vandament.—Final account and petition for distribution filed; August 3 set for hearing.

Estate of John G. Nute.—Final account and petition for distribution filed; August 3 set for hearing.

## Athletic Club Installation.

The Jackson social and athletic club at the regular meeting held July 18, installed officers for the ensuing term as follows:

President, T. J. Burrows; vice president, J. Garbarini; recording secretary, S. Dal Porta; financial secretary, Chas. Tam; treasurer, R. I. Kerr; marshal, John Giozzi.
